

OPERATING & MAINTENANCE

IMPORTANT:

Operators – The more often these tasks are performed, the easier they are to undertake. Be aware of the potential for cross contamination and act accordingly.

We would recommend using disposable gloves and hand washing after completing tasks.

1

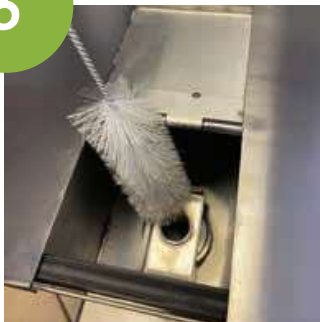

Empty the strainer basket regularly & wipe out under lid

2

Empty oil cassette into grease collection bin- daily or as required

3

Use the bottlebrush daily, or as required to clean oil outlet assembly- both vertical and horizontal areas

4

Open flush valve daily for 10 seconds with water flowing through unit do not allow unit to empty as heating element may become damaged
